

JavaServer Faces has come a long way in the past few years. Everyone from small startups to large financial institutions are using JSF. Dozens of open source projects are built on JSF.

The JSF Summit conference will focus on core skills, development tools, frameworks, third-party components, and the latest industry trends. Sessions will target the needs of application developers, solution architects, and project managers. Some of the key topics covered include: **JSF 2.0, Seam, Spring integration, Ajax support, portlet development, testing, and other popular component suites.**

Register by September 21st and save \$400!

JSF Summit is your chance to take your skills a step up, network with your peers, and learn from some of the most talented people in the industry. Come join us at the annual JSF Summit conference as we explore the JSF in depth!

Save Big with Discounts

- 4) Alumni Discounts - Have you attended before? Watch your email for alumni rates.

Topics for 2009

JSF Summit will offer 3 concurrent sessions. Throughout the duration of the event, there are sure to be sessions of interest available to all developers. Check jsfsummit.com for session details.

- JSF 2
- Frameworks: Seam, ICEFaces, Spring, MyFaces, Liferay
- Ajax with JSF
- Testing
- Agile Practices
- Architecture & Scaling

Two Conferences in One Location

JSF Summit will be held concurrently with [The Rich Web Experience](http://therichwebexperience.com). Your admission to JSF Summit includes access to both of these great events. *The Rich Web Experience* focuses on enhancing user experience on the web. Some of the topics covered will include: Ajax, Javascript, and Web Standards. Session and location details will be announced soon. Check out therichwebexperience.com.
